The ATC UV-60 and UV-80 Liquid Coating Systems

Description

ATC RTR â?? Roll To Roll Liquid Laminator

default watermark

ATC UV80 Flatbed Laminator

ATC coating machines are designed to coat both flexible and rigid substrates up to 3â?³/7Smm thick. They feature extra-large rollers to ensure precise, full-width, edge-to-edge coverage, with a speed range from 30 ft.

The ATC UV80 (left image) offers an optional roll-to-roll feature for users who need or want to coat flexible material.

The RTR series (right image) is a dedicated roll-to-roll machine that can be fitted with a large production jumbo reel feed and take-up system for mass coating production. Our unique Meyer rod coating bar ensures a perfect, even coating on a wide selection of media, including textured media.
