ClearJet A2000

Description

ClearJet A2000 Inkjet Spray â?? Fixative & Protective Clear Laminate, UV protections

Clearjet A2000 is from our Range of inkjet sprays (Solvent) which are all set and ready to use. Its solvent based chemistry allows for greater certainty to protect and work with almost any paper, film substrate and ink technology. Clearjet A2000 comes in a 463ml aerosol and is ready to use, and there is no clean up required either.

A2000 by Marabu will enhance your prints, as well as protect them against the effects of water, chemical and abrasion as well as prolong the quality and vibrancy of your prints when expoosed to UV light. Our High performance resins and UV inhibitor can confortably ensure you get as much as double the life of your print compared to an un protected Print. this is the result of our own real life tests.

Please note: These coatings are solvent based. They need to be solvent-based to be effective and to work with paper and certain other dye based, and water sensitive substrates. If you have films, canvas and other water resistant prints and substrates it is possible to use our more eco friendly and healthier range of water based coatings, Colourshield and Clearshield by Marabu range .

You need good air circulation and should use protective masks to protect yourself when using A2000, or at least ensure you have excellent air circulation when using the Clearjet A2000.

For larger projects, it is also possible to use the Clearjet coatings from a tin with a hand roller or brush. Drying time is quite fast, usually about 10 -15 minutes in ambient indoor conditions. Available in two finishes: Gloss and Satin.

ClearJetÂ® A2000 Inkjet Spray by Landor UK

Quick, Clean, Professional Protection for Your Prints

ClearJetÂ® A2000 by Landor UK is a premium, easy-to-use aerosol spray designed to protect and enhance inkjet prints. This UV-resistant, water-resistant clear coating acts as both a protective laminate and a vibrant image enhancerâ??all without the need for special equipment.

Formulated with high-quality, optically clear resins, ClearJetÂ® A2000 provides a professional finish while preserving the sharpness and colour accuracy of your prints. It dramatically improves resistance to UV fading, moisture, and abrasionâ??extending the life and quality of your artwork, photos, and

printed designs.

Whether youâ??re a professional photographer, artist, designer, or hobbyist, ClearJet is the go-to solution for quick, clean, and effective protection. Choose your preferred finishâ??**gloss, satin**, or **matte (low-gloss)**â??for the perfect look and feel.

- **Fast-drying and low-odour**
- **No special tools or messy clean-up**
- **Trusted by creatives across industries**
- **Ideal for canvas, paper, and photographic media**

Our Aerosol sprays will transform your prints into durable, Water proof, protective, and UV fade, abrasion and chemical resistant prints

Versatile Protection for Virtually Any Surface

ClearJetÂ® A2000 liquid laminate spray is designed for broad compatibility across nearly all print and decorative surfaces. It adheres beautifully to canvas, vinyl (both enamel receptive and non-enamel receptive), banners, fibreglass, wood, metal, plastic, and paperâ??offering reliable protection regardless of your medium.

Optimised for **water-based inks**, ClearJetÂ® A2000 is also fully compatible with **solvent, UV, latex**, and even **dye sublimation** prints, making it one of the most flexible and universal protective sprays available.

For fine art applications on canvas or fine art papers, we recommend ClearJetÂ® FA (Fine Art) â??specially formulated to penetrate the surface and bond with the ink and media. This ensures enhanced flexibility, superior water resistance, and long-term archival protection, preserving the beauty and integrity of your artwork for years to come.

For Protecting Canvas we reccomend you use our Product specific Clearjet AFA spray Protect Your Canvas prints against cracking, when you stretch canvas. an important and essential feature of Clearjet FA.
