Eazywallz Vintage Floral wallpaper using Landor UK Phototex

Eazywallz believes that every wall has a story to tell, and its high-quality custom wallpapers and wall murals are the key to letting yours unfold. With designs ranging from the latest interior design trends to original artworks produced in collaboration with photographers, illustrators and painters, Eazywallz caters for the full scope of dÃ©cor preferences and needs. Developed with the consumer in mind, Eazywallz offers made-to-measure wallpapers and wall murals for restaurants, hospitals, hotels, corporate offices, wellness centres and homes, to name just a few. Eazywallzâ?? internationally acclaimed removable wallpaper and wall mural solution is powered by Phototex, a patented self-adhesive, peel-and-stick wallpaper sourced exclusively from Landor UK.

Why Eazywallz sticks with Landor UK Phototex

When it comes to removable wallpaper, there is no compromising on quality. Generic self-adhesive wallpaper often damages walls when it is removed. Generic papers are also known for ripping and wrinkling, curling at the edges or even falling off the wall completely.

Eazywallz sources Phototex exclusively from Landor UK, guaranteeing the best possible version of the removable wallpaper concept. Landor UKâ??s Phototex self-adhesive, peel-and-stick removable wallpaper offers all of the following benefits:

Trace-free

- Phototex leaves absolutely zero residue once removed, so your wall stays in the same condition it was in before you began.
- If your wall is painted, you can rest assured that Phototex wonâ??t flake or peel off any layers of paint.

Mess-free

- With no glue involved, your home stays spick and span throughout installation.
- If the mural gets dirty, you can safely wipe it clean with no risk of the colours running, thanks to its durable polyester composition.

Simple installation

- Installing traditional wallpaper is a project in itself: the dust, the glue and the risk of positioning the paper incorrectly and having to start again. With Landor Phototexâ??s self-adhesive material, installation becomes a painless peel-and-stick process. Goodbye glue, goodbye dustâ?¦ and if you do install it the wrong way, simply unstick it and start again. Donâ??t worry, it wonâ??t lose its stickiness!

Your imagination is the limit

Eazywallzâ?? diverse client portfolio includes architects, interior designers and advertisers, to name just a few. Its customers have used Landor Phototex to bring diverse and exciting projects to life. Take a look at some past projects below for inspiration for your own.
