Liquid Lamination Applications

Protecting Graphics in All Environments

Landor Liquid Lamination solutions are tried, tested and trusted on a range of applications. Our laminates can be applied by hand with rollers and sprays or can be used to cover surfaces many metres wide with our range of laminating machines.

Landor Liquid Lamination is an exclusive range of high performance and durable state-of-the-art finishing products. They provide essential protection as a digital varnish, digital lacquer or liquid laminate as well as a resilient digital coating. It can also provide an even topcoat or primer that preserves prints indefinitely as well as increasing the image quality and vibrancy, adding abrasion resistance and providing added UV protection.

Anti-Graffiti

Landor Anti-Graffiti Protective Liquid Laminates allows you to remove graffiti quickly and effortlessly without damaging the liquid laminated surface.

ClearShield Anti-Graffiti Clear is highly flexible chemical and UV resistant liquid laminate, easily cleaned with solvent or Landorâ??s non petroluem citrus based cleaner.

Anti-Microbial Coatings

Companies have a corporate responsibility to ensure surfaces are safe for their customers, staff and the wider environment and community. This means keeping areas where there is heavy traffic and heavy exposure free from potentially harmful bacteria and viruses. Landor ColourShield SafeTouch can help you meet this responsibility.

Landor ColourShield SafeTouch is a range of easy to use and easy to apply liquid and film products that is ISO 22196 certified. It can be used together with Phototex printed media to add colour graphics and promotional imagery that can bring pleasure to your protection.

Vehicle Graphics

Create stunning vehicle wraps and graphics for your business fleet.

Our Transit Wrap Gloss is formulated with high quality resins for additional and increased protections that are designed to protect vehicle graphics from dirt generated by everyday use.

Truck Sides

Truck Curtain Side Protection is a provided by Landor UK with Truckside Gloss Coating. This is a highly elastic liquid laminate for truck and lorry curtain sides and hard side printed surfaces..

Truckside Gloss Coating is formulated with added chemical resistance protecting the livery from dirt generated by everyday use. It is abrasion resistant and provides long term UV protection.

Protecting Canvas and Fine Art Inkjet Prints

Canvas printing is a very popular and rewarding way to display, and reproduce works of Fine Art & Photography.

Printed canvas will always benefit from a top quality Liquid Laminate to enhance as well as extend its life.

Our canvas protective coatings first and foremost, protect canvas from the effects of moisture, pollution, water, and UV fade, which would otherwise degrade and affect the longevity of a canvas Print. It also prevents the cracking of the ink on the textured weave of canvas when stretched onto a frame.

Protect Bouncy Castles, Soft Play, leisure products indoors and outdoors as well as commercial Branding and events inflatables

For essential protection, especially given the outdoor exposure and weather, rain, snow, cold, heat environments, customised and unique inflatables for bouncy castles and indoor child soft play does put the ink to the test.

For corporate events and in some cases temporary shelter at events make inflatables a popular outdoor events and Branding product. But to withstand these elements Landor Liquid lamination has been protecting inflatables and soft play prodcuts for over 25 years.

Waterbased, UV curable, latex, eco-solvent inks all need extra protection when exposed to these applications and environments. We reccomend gloss coatings every time for that added abrasion resistance.
