Corporate and External Signage

Protect your corporate identity from the elements with our high-performance coatings built for exterior coatings.

Designed to repel moisture, withstand heavy winds, and resist UV-induced fading, our solutions ensure your outdoor graphics remain vibrant and professional for years to come.

By effectively doubling the anticipated lifespan of your prints, Landor coatings provide a sustainable, cost-effective alternative to frequent re-printing and installation.

Digital WallCoverings

High-traffic areas can take a toll on digital wallcoverings, leading to premature wear and fading.

Protect your investment with our advanced water-based liquid lamination.

This invisible shield safeguards your murals and graphics against abrasion, ensuring they remain vibrant and durable for longer. Choose a sustainable solution that preserves your visual communications while minimizing the need for constant updates

Public Office Building Lobby (Main Entrance Atrium)

Home Office (Aspirational and Functional)

Anti-Graffiti Protective Coatings

Protect your outdoor branding and site hoardings with our high-performance anti-graffiti coatings. Designed to safeguard surface clarity and graphic vibrancy, our range includes options for both UV-curable production and on-site hand applications.

Our technology ensures that even the most stubborn graffiti is easily removed without compromising your message.

If you are looking for superior protection against heavy wear, UV exposure, and moisture, we provide the durable, long-lasting solutions you need to maintain a professional appearance

Canvas Fine Art Prints

Whether you want environmental protection and an archival, sustainable lifespan for your fine art prints and artworks, keep in mind that canvas is often vulnerable to cracking and premature failure after stretching. Our premium coatings allow you to overcome these challenges, acting as an invisible shield that preserves the texture and depth of your photography and artwork. Not only do they guard against environmental pollutants and handling wear, but they also enhance the vibrancy of the pigments, ensuring your work remains a legacy piece that stands the test of time

Soft Play & Inflatables

High-traffic play equipment requires more than just high-quality printing; it requires exceptional protection. From bouncy castles to modular soft play, our protective coatings offer the ultimate defense against the abrasion, moisture, and frequent handling inherent in these environments. Our technology provides the long-lasting stability necessary to preserve your graphics, ensuring that your equipment remains vibrant, professional, and ready for continuous, heavy-duty use

Vehicle Graphics

Maximize the lifespan and impact of your mobile branding with our high-performance liquid laminates.

Specifically engineered for vehicle applications, our coatings provide the superior protection required for rigid panels and full wraps alike. This essential solution preserves graphic clarity and color vibrancy, ensuring that your fleet branding stays sharp and resilient against the environmental demands of constant travel

Flexible coating, optically clear, water, chemical, abrasion and UV fade resistance, your corporate graphics can last a good five years without change or degradation, strengthening and representing your brand and image.

LANDOR ANTI-MICROBIAL COA
3510TH OFFICIAL GI ORGANSEOR VAL CERTIFIC
- ISO 22196 CERTIFI

- INHIBITS MRSA, E. COLI & BACTERIA
- WATER, CHEMICAL, UV & ABRASION RESISTANCE
- PROACTIVE SAFETY - EXTENDS PRIN

Anti-Microbial Coatings

Maintain safer, cleaner spaces with our integrated anti-microbial surface protection, with our ISO 22196 Certified anti-microbial coatings

Ensure the safety and protection against the possible transfer of bacterial in high traffic or vulnerable areas.

Designed for environments where public health is a priority, our coatings effectively combat the spread of harmful bacteria like MRSA and E-Coli on frequently touched surfaces. This specialized treatment ensures your visual communications remain hygienic, while simultaneously providing the high-performance durability required for busy, high-traffic areas, including resistance to chemicals, moisture, UV rays, and physical wear

Public Venues

default watermark

High-traffic public spaces demand long-lasting graphic solutions that can withstand rigorous daily use.

Landor liquid lamination helps you avoid the costs of premature replacement by creating a protective, sustainable barrier against the effects of dirt, debris, and abrasion.

For venues with specific operational needs, we offer the added security of our anti-graffiti technology to protect against vandalism, as well as anti-microbial coatings that help maintain hygienic standards in high-touch meeting and sitting areas. â?? An all in one solution !
