Combining more than 25 years experience and development of constantly changing ink technologies we are well place to enhance, protect and extend the lightfastness of your Print Assets

We have an open Door policy to help you achieve the results and the Protection you need for your business. Our equipment is now available for Sale or Rental or Lease Purchase, or contact us and let us see how we can help you in house or in your own premises.

Printed or unprinted we can assist you with an eco friendly Durable and sustainable solution for your next project

Water based Print protection

Our water based coating systems are available in both 1.6m and 3.3m widths to purchase or to rent for projects. In addition we can undertake projects to suit your needs and requirements.

This effective and eco friendly method allows you to add an extra layer of protection and durability to your valuable prints either for the protection against water, chemical, abrasion, premature uv fade all of which can double the life of your prints

UV Curable Rigid & Flexible Print Protection

UV curable coatings and systems enable that extra layer of protection for the extended life and durability of boards and is particularly relevant for the durability and life span of prints in the outdoors. From external hoardings and interior point of sale, public retail and transportation applications our UV curable coatings will ensure the life span and longevity of your prints.

Anti-graffiti and anti-microbial protection is an additional protection available for our coating systems and services.

Protection of Inflatable Bouncy Castles

Anti-MicrobialPrint & High Touch Protection
