Seal AquaSeal 3300

Description

The Seal SW3300 and SW5000 superwide liquid laminators have now been discontinued. However, many of these and the smaller AS1600 series are still in use today, so if you are looking for a liquid laminator, you can be sure of a very efficient, reliable and long-lasting liquid lamination coating system. At Landor UK we have been working with liquid lamination since before 2000, and with more than 17 yearsâ?? experience, we can assure you of our expertise and knowledge in helping you use liquid lamination in your production process.

Now supporting companies globally, we can meet you in the UK or in your country to help you get the best life out of your work, provide the best possible protection and support you with leading-edge technology in both coatings and coating systems. We are launching our new generation of coaters, so alongside our very effective liquid laminators from stock, we will soon be able to offer the latest in efficiency and productivity in liquid lamination coating.

default watermark

- Superwide / heavy duty
- 3.3m (130â?³) wide
