Protecting Your Truck Curtain Assets

Description

No matter what your vehicle size or material that covers your load, you need to keep these clean and maintain them regularly. Printed or unprinted.

Thanks to our Liquid lamination coatings that we have developed and supplied over the last 20 years you can now safely protect and extend the life of your Truck curtain sides and truck sides, hard and flexible, printed or unprinted

You can talk to us about anything you need our help with. From advice to protect, printed curtains and trucksides, coating methods and options or even allow us to project manage your next truck side or vehicle project.

default watermark

As you can see from the images here these are standard curtains (Unprinted) that need protection and regular cleaning otherwise the dirt, pollution, chemical, heat, cold, ice, frost collectively will shorten the life of your trucks.

Even paint on a vehicle has protection but it also is not immune to damage and permanent degradation if you do not clean them. The longer the dirt sits on the surface the deeper the dirt and chemicals will penetrate into the surface.

Default watermark

Printed Curtains such as these are equally vulnerable to premature degradation if not maintained well.

Regular cleaning with water and non aggressive cleaning agents, preferably without alcohol or heavy duty solvents will protect your curtain and truck assets over many years

Our experience and real time customer feedback is credible for as long as 7 or more years in UK environments.

Thanks to our UVinhibitors and high performance resins you can also count on extra time and life span when using our liquid lamination coatings.

Our range of liquid laminators for truck curtains : 3.3m wide water based high performance coating systems by Landor
