Digital Wallpaper â?? Liquid Lamination Coatings

Description

Digital Wallpaper Matte Liquid Laminate

Landor Wallpaper Matte Liquid Laminate is designed to work with and to protect all inkjet printed wallcoverings including Landor Phototex Self adhesive fabric, vinyl, alternative adhesive films, and paste the wall wallcoverings and wall fabrics. We also have satin and gloss finishes available. Wallpaper matt is used and referred extensively by most wallpaper manufacturrers and installers. Wallpaper, when coated, is protected with our specially formulated coatings (liquid laminate) providing a protective matt finish. Our wallcovering coatings range are easy to use, and apply with great effect and provide essential protection, durability and preservation of your wallpaper artworks. We recommend installing your wallcoverings first, and then hand apply our wallpaper matt coating over the finished Wall coverings for the best protection and a wipe clean surface.,

Wallpaper Matte Liquid Laminate is an environmentally friendly, low sheen Matt coating finish designed for low reflection and colour vibrancy.

- Designed to be used with all inkjet digital wallpaper, especially Landor Phototex.
- Water based product which increases water resistance of Inkjet Wallpaper.
- Matte finish with low glare sheen designed to enhance colour vibrancy.
- Added resistance to physical abrasion with liquid lamination.
- State of the art UV inhibitors, doubling the light fast rating.
- Hand roller or Liquid Lamination machine compatible.

Our wallpaper coatings are available in wallpaper Matt, Wallpaper Satin and Wallpaper Gloss.
